Genres : Mathematics - Physics/Chemistry/Biology

Keywords : Geometry - Economy - Air - Overconsumption - Pregnancy

The first book to explain why mathematics really is everywhere!

Did you know that math is much more than computers or social networks and their infernal algorithms? Math can predict the tides, decode secret messages, create musical melodies, and even multiply necktie knots! By revealing the hidden beauty of theorems at the heart of our daily lives, this beautifully illustrated book sheds new light on mathematical concepts and their uses. Because mathematics is more than just equations!
