Human Mobility and the Environment From Global to Local

Authors: Christel Cournil (Edited by) - Chloé Vlassopoulos (Edited by)

Publisher : Quæ

Category : Science, Technology, Medicine

Genres : Environmental sciences

Keywords : Mobility - Free verse

Climate and environmental change are giving rise to human movements and migrations that create real challenges for international governance.

Based on recent events, this book offers a representative panorama of different types of movements occurring already in the developing countries as well as in the so-called developed countries. It discusses the potential of public policies and legal instruments currently in effect and ponders the new realities to which these environmental migrations will give rise.
