A journey of the senses that also provides toddlers a chance to learn more about the water cycle.

This is the story of a very special bird. When he flies in the sky, his feathers actually provide water to the ground. And when his swallow friends start winging away on the big trip they take every year, he knows it's time to go join them. But one year, he misses the big departure. Now, flying on his own, he keeps an eye out for the swallows heading south. Good thing he can count on Bat, Caterpillar, and Squirrel to help him find his feathered friends.
