New Ways to Live in Cities

Sustainable Cities That Are Great Places to Live

Authors: Laurent Estival (Text) - Marjorie Musy (Preface)

Publisher : Quæ

Category : Science, Technology, Medicine

Genres : Environmental sciences

Keywords : Sustainable city - Food - Daily Life - Sustainable city

Will cities of the future seem like Paradise on Earth, ensuring well-being and good health for all their inhabitants?

The question might sound surprising. And yet from Zurich to Tokyo, researchers, businesses and ordinary citizens are working together to invent metropolises of the future that will also be great places to live.

With contributions from over a dozen experts, this book explores changes currently underway, pointing out advances as well as limitations, and taking neither a radically environmental nor a blindly technological viewpoint.
