Malvina is an amazing girl. She could invent a time-machine if she wanted! But the robot she's trying to build is a lot harder to conceive than that.

Malvina is a engineer full of imagination: each and every day she invents incredible machines to assist or entertain her in her daily life. Her mother, on the other hand, spends most of her time worrying herself sick over every last detail. Malvina dreams about these worries flying away and disappearing. Summoning all of her creativity, the young girl decides to invent a machine that will appease all her mother's worries. But things don't quite go as planned...
