What this comic has to say, women have already known deep down for a long time. Overdeveloped neocortexes, filled with centuries of fears, have made women accept an over-medicalized birthing experience. Too long deemed the "weaker sex," women have come to believe childbirth must a painful ordeal impossible without medical assistance. And by dint of these beliefs, they have suppressed the part of their brains that has always known how to deal with childbirth, from the start.

This book describes what happens when women give birth without fear or interference. Restoring to women the knowledge of their own bodies means restoring a feeling of competency about the act of creating life.
