A picture book that urges us to observe and discover nature.

When it's summertime in the orchard, you can eat the berries without a care in the world.

The berries are eaten by a jay, who is eaten by a weasel, who is in turn eaten by an owl, who will be eaten by a falcon, who will fall back to Earth to feed the berries...

The first two-page spread presents the countryside where the different animals can be tracked inside geometric structures the authors have designed. The next spread shows the relevant food chain. The whole picture book pays tribute to the inner workings of the vegetable and animal kingdoms. An invitation to enjoy nature to the fullest, *Under the Sun* introduces its readers to the harmony present in wildlife.
