Our Oceans: A Graphic Novel

Authors: Jean-Baptiste de Panafieu (Script writer) - Vincent Bergier (Drawings)

Publisher : Casterman

Category : Comic Books and Graphic Novels

Genres : Children's Comic Books

Keywords : Climate change - Pregnancy - Healing - Satire

Sail around the world and learn all there is to know about the seas—which need saving now more than ever.

After Evolution and The Evolution of Humanity, another playful comic about science.

Did you know the Earth owes its nickname "the blue planet" to the fact that water covers over 70% of its surface? Home to countless species, seas and oceans play an essential role in preserving biodiversity and natural landscapes. Today, they are endangered by climate change, overfishing, tourism, and pollution of both waters and coastlines. In this nonfiction graphic novel, take a tour of the Earth by sea and discover a fascinating world we must protect at all costs.
