Keywords : Environment - Activism - Neuropsychiatry - Saga

---

For the first time, all the ecological data of our era in one place: an atlas.

Climate change, erosion of biodiversity, demographic evolution, urbanization, atmospheric pollution, soil deterioration, natural disasters, industrial accidents, health crises, social activism, international summits: here is the first atlas to gather together, in one place, all the data about the environmental crisis of our time. An inventory as limp as it is unforgiving, a call to activism.
