In a not-so-distant future, people are living in domes because the outside air is polluted... so they claim!

Everyone under 16 is subjected to the Roundup. The government sorts them into categories: the Great, the Laborers, and the Forgotten. This last caste is taboo. But when our heroine Eléa sees her best friend consigned to the Forgotten, she will stop at nothing to find her again. No matter the cost—even digging into the terrible secrets of the New World Order.
