A moving and original picture book about the cycle of life as a tree might see it!

One winter's dawn, a few shoots enter the world from a few pits in a pot. In the spring, he replants the sapling in the ground. The seasons go by, and what is now a big tree welcomes one generation after another as they play among its roots and enjoy its juicy fruit. And even when Gabriel leaves his leafy friend, the cycle of life goes on, like mirabelle plums growing every summer from its branches. This story is told from the highly original point of view of a tree, in a poetic style suffused with all the wisdom we attribute to nature, and perfectly paired with gentle, luminous, and tender illustrations.
