52 Weekend Science Experiments for Young Physicists

Authors: Auguste Gires - Nathanäel Gires - Nikita Gires

Publisher : Delachaux et Niestlé

Category : Children's Books

Genres : Activity/Game Books

Keywords : Physics - Anthill - Care - Empowerment - Archeology

52 fun and easy physics experiments using readily available household items. Science it up all year long with your kid!

Make a rocket from a balloon, or blow one up without using your mouth! Desalinate water, make lightning, a diving bell, a rolling bearing, or an electric motor, and best of all understand how and why it works! Follow along as a father and his two sons spend quality time every weekend experimenting! These easy little physics experiments using readily available household objects help children understand the world around them and its workings from a technical and scientific perspective, with an eye toward kindling curiosity about the explanations behind seemingly mysterious phenomena.
