

The Hidden Structure of Reality

Authors: Jean-François Froger - Robert Lutz

Publisher : DésIris

Category : Science, Technology, Medicine

Genres : Physics/Chemistry/Biology - Mathematics

Keywords : Physics - Theology - Air - Uprooting - Greed

Based on a new kind of logic known as quaternary logic, this unique work shows the links between metaphysics, physics, and theology.

Understanding reality entails examining the logical foundations of scientific theories. The book shows that quaternary logic makes the existence of fundamental particles deductible and their properties intelligible, leading to an epistemological unification of scientific knowledge and the theological expression of the dogmas that structure the Christian faith.
Bilingual French-English edition.
