A collaboration between two committed feminists who, having once revolutionized our vision of sexuality, now update it!

"The only thing we can be sure about in terms of sex is that we are the only people who should decide what we do with our bodies. Nothing and no one should ever dictate what we do." Five years after the first edition of *Libres! (Free!)*, Ovidie and Diglee update their important work by adding eight new chapters on such topics as the mental load linked to contraception, online harassment, asexuality, the orgasm gap... These and many other issues covered in this book are at the center of public debates today, proving once more that intimacy is political.
