Organic! All-natural! No added sulphites! Or so the labels claim. But how can you tell these wines apart?

Confusion reigns when it comes to claims about wine, but Pierre Jancou wants to make it easier for you with this book. *Living Wine* sounds like a manifesto from a crazy lover of "fermented grape juice," but without going overboard, Jancou provides a wonderful, objective survey, interviewing 16 winemakers representative of these nectars made only with healthy and beautiful grapes!
