What do the clothes we wear say about us, our means, and our habits?

Every morning, we get dressed. We need them to protect our bodies from the outside world, and to make ourselves presentable in society. But might our closets be a bit too full? In the era of fast fashion, issues of the environment and the secondhand economy are more pertinent than ever. This book surveys the history of clothing and the contemporary stakes involved: equality, environment, inclusivity, and more.
