Publisher : Casterman

Category : Comic Books and Graphic Novels

Genres : Non-Fiction

Keywords : Future - Ecology - Technology

What will our planet's future look like?

According to the billionaires in Silicon Valley, our destiny inevitably lies with the metaverse, artificial intelligence, autonomous robots, and space exploration. But our planet is dangerously close to its limits. Can we really keep on growing infinitely? Or should we focus on implementing organized frugality instead of a frantic race forward? *Resources* presents a sometimes alarming assessment of the state of our planet, but also offers readers concrete solutions for a more responsible future.
