Keywords : Society - Economics - United States

---

This reference work for the human sciences is the fruit of expertise, in-depth research, and contributions from recognized authors.

Geographers Jacques Chevalier and Gérald Billard from the University du Maine in France offer a geography of the United States of America. Nine thematic chapters invite readers to discover the country, its society, the internal foundations of American power, and its role in the global environment.

Maps, diagrams, and introductory summaries at the beginning of each chapter make this work an easy-to-use reference tool.

At the end of the book, readers will find an index of the main concepts and a bibliography for each topic covered.
