More than just a graphic novel, this 1,300-page work is a rich and visual encyclopedia.

Having explored in the first three volumes the imagery used to represent the evolution of the universe and the history of the human race, Jens Harder's focus switches here to the future. How is our planet going to turn out? What fate awaits us in this context of dramatic climate change and the advent of mass extinctions? What role will technology play in our survival? All these questions and more are addressed in this final volume of his "Great Story."

A dazzling finale to a monumental work.
