The Enigma of Life in the Cosmos

In Search of Other Habitable Worlds in the Solar System and Beyond

Authors: Thérèse Encrenaz (Text) - Athéna Coustenis (Text)

Publisher : Eyrolles

Category : Science, Technology, Medicine

Genres : Physics/Chemistry/Biology

Keywords : Astrophysics - Space

At the crossroads of science and imagination, embark on the quest for extraterrestrial life and discover habitable worlds, space exploration, and the mysteries of the cosmos.

Whether on Venus, the interstellar object 'Oumuamua, or a distant exoplanet, the question of extraterrestrial life has fascinated humanity for centuries. Beyond fantasies or fiction, scientists are conducting exciting research on the possibility of life elsewhere in the universe: where could it have already arisen or where might it arise in the future? In this richly illustrated book, two astrophysicists invite readers on this incredible quest through time and space.
