

Atlas of the end of the world

80 expeditions to broaden the horizon

Author: Bruno Reguet

Publisher : Lapérouse

Category : Practical Books

Genres : Tourism/Travel

Keywords : Exploration - Far reaches

How to explore the confines? Is there a map of the ends of the world?

Are there still unknown lands in the 21st century? Where can we find the extremes of our planet – way up high in the atmosphere, down below in the ocean's abyss, or deep within the Amazon jungle? What stories do odysseys to fantastic lands tell? Why do some frontiers and unusual walls outline the contours of the Faraway? The encounters of great explorers have pushed the limits of the known world. Now it's your turn to set off on an exciting and inspiring journey with this atlas, illustrated with exceptional photographs and maps.
